Solactive Aging of America Merged Series 7 ER Index

DESCRIPTION

The Solactive Aging of America Merged Series 7 ER Index (the "Index"):

- Provides exposure to stocks of certain companies concentrated in the healthcare and real estate sectors that may benefit from the long-term demographic shift towards an older population in the United States.
- Is calculated on an excess return basis by measuring the extent to which (a) the stocks and any money market position outperform (b) SOFR + 0.26161% and 0.75% per annum (accruing daily).*
 - The money market position reflects the returns accruing on a hypothetical cash investment in a notional money market account denominated in U.S. dollars that accrues interest at the notional interest rate, which is equal to SOFR + 0.26161%.*
- Applies a daily volatility control:
 - Volatility cap: 7%. It is measured on a daily basis by calculating the realized volatility of the stocks for a 20 index business day look back period. The Index is rebalanced by ratably reallocating all or a portion of the exposure to the stocks in the Index to the money market position sufficient to reduce the realized volatility for such period to the volatility cap.

Note Regarding the June 2020 Transition

- The Index will track the Motif Capital Aging of America 7 ER Index (the "Terminating Index") through June 23, 2020. The Terminating Index will cease to be published after June 23, 2020.
- From June 24, 2020, the Index will be calculated, administered and published using a methodology that is substantively the same as the Solactive Aging of America 7 ER Index, except that the closing level of the Index on June 23, 2020 will have been set to equal the closing level of the Terminating Index on June 23, 2020.
- Differences in methodology between the Terminating Index and the Index will cause the composition of the Index on and after June 24, 2020 to differ from the composition of the Terminating Index had the latter index not been discontinued. Although the theme and main characteristics of the Index and the Terminating Index have similarities, they are not identical. The Index is a different index than the Terminating Index. For example, the Index uses algorithms and methods developed by Solactive to select and weigh component stocks and not the ones developed by the sponsor of the Terminating Index. While some stocks will be common to both indices, some stocks will not be the same.
- Past performance of the Terminating Index is not necessarily indicative of the future performance of the Index.

* Prior to January 01, 2022, the 3M USD Libor rate had been used.

HISTORICAL PERFORMANCE**

** Levels to the left of the vertical red line are closing levels of the Terminating Index. Levels on and to the right of the vertical red line are closing levels of the Index using its own methodology. The Index is a different index than the Terminating Index and past performance of the Terminating Index is not indicative of the future performance of the Index. Past performance is no guarantee of future results and may be lower or higher than current performance.

It is not possible to invest directly in an index. Exposure to assets represented by an index is available through investable financial instruments that seek to provide an investment return based on the performance of an index. A decision to invest in any such financial instrument should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such financial instrument only after carefully considering the risks associated with investing in such financial instruments, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the financial instrument or vehicle.

The financial instruments are not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index level at any time or in any other respect. Solactive AG makes no assurance that financial instruments based on the index will accurately track index performance or provide positive investment returns. Solactive AG is not an investment adviser and nothing in this factsheet constitutes a recommendation by Solactive AG to invest capital in financial instruments nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in a financial instrument. Inclusion of a security within an index is not a recommendation by Solactive AG to buy, sell, or hold such security, nor is it considered to be investment advice.

Past performance should not be considered as indication or guarantee of any future results. Charts and graphs are provided for illustrative purposes.
