Horizon Ascend 5 Index

INDEX DESCRIPTION

The Horizon Ascend 5%™ Index ("the index") is managed by Horizon Investments, a modern goals-based investment management firm, founded in 1995 in Charlotte, North Carolina, with an emphasis on ETF asset allocation. The Index allocates across a diversified multi-asset universe of ETFs to seek returns, while targeting a specific desired level of risk. This multi-asset universe includes U.S. equity securities fixed income securities, and securities related to commodities. Allocations rely on research on volatility and trend-based signals, and adjust on a monthly basis in an attempt to capture upside. The index targets consistency and a smooth path of 5% volatility using a risk control process that may adjust as frequently as daily to achieve the desired level of risk. The three techniques of broad diversification, trend following, and volatility smoothing, govern the core of the process and are designed to provide the opportunity for growth under both good and bad market environments. The index includes reinvested dividends and is calculated excess of SOFR plus a spread.
