

GS Momentum Builder® Multi-Asset Class Index

INDEX INFORMATION

Ticker	GSMBMAC
RIC	.GSMBMAC
Thomson Identifier	SLA8GS-ST
Index Sponsor	Goldman, Sachs & Co.
Currency	USD
Number of Underliers	max. 9
Volatility Target	4.50%
Daily Volatility Control	5.00%
Index Calculator	Solactive AG
Index Base Date	Dec-21-2001

STRATEGY OVERVIEW¹

- The GS Momentum Builder® Multi-Asset Class Index ("GSMBMAC"):
- o Provides exposure to indices tracking US equities, International equities, US bonds, International Bonds, and Commodities
 - o Seeks to provide exposure to price momentum of several asset classes using a methodology developed by Goldman, Sachs & Co (Index Sponsor)
 - o Combines 8 underlying total return indices across five asset classes and a cash equivalent through a Money Market Position that seeks to capture the highest historical return among the universe of underlying assets selected by the Index Sponsor's methodology, subject to constraints on maximum weights and volatility controls
 - o Is rebalanced monthly and may be rebalanced as frequently as daily if the realized volatility of the Base Index exceeds the volatility cap
 - o Applies two levels of volatility control across the portfolio:
 - o Target volatility: 4.5%. It is measured on a monthly basis and sets a maximum limit on the annualized historic realized volatility on each monthly rebalance date
 - o Volatility cap: 5%. It is measured on a daily basis. The index is rebalanced whenever the annualized historic realized volatility of the Base Index exceeds the volatility cap
 - o Is calculated on an excess return basis over the sum of (i) a notional cash deposit at Fed Funds, compounded daily and (ii) a daily index cost of 0.5% per annum

REBALANCING PROCESS¹

- Step 1: On each monthly rebalance date, test the possible portfolio combinations of the underlying assets (comprised of the 8 indices and the Money Market Position)
- Step 2: For each look-back period (the prior nine months, six months and three months), consider only those portfolios that have a realized volatility of 4.5% or less for such lookback period
- Step 3: Of the remaining portfolios for each look-back period, choose the portfolio for such look-back period with the highest realized return
- Step 4: Average the weights of each underlying asset in the 3 portfolios chosen in step 3 (one portfolio for each of the 3 look-back periods) to determine the weight of such underlying asset in the Base Index
- Step 5: On a daily basis, including the monthly rebalance date, monitor the realized volatility of the Base Index over the past three months, if this volatility exceeds 5%, a pro-rata portion of the Base Index is allocated to the deleverage position (Money Market Position)

¹ The strategy and rebalancing process are further described in the full rulebook available at <http://www.solactive.com/downloads/GSMBMAC.pdf>

INDEX COMPOSITION

ASSET CLASS	NAME	TICKER	MIN WEIGHT	MAX WEIGHT

INDEX PERFORMANCE VS. INDIVIDUAL ASSET CLASS SPECIFIC ETFs SINCE AUGUST 2014²

² The values of the individual asset class specific ETFs are total return, i.e. ETF dividends are reinvested. The total return versions are calculated by Solactive AG. Base Date: Jan 02 2013. Back-testing and other statistical analysis material that is provided in connection with the Index use simulated analysis and hypothetical circumstances to estimate how it may have performed prior to its actual existence. The results obtained from "back-testing" information should not be considered indicative of the actual results that might be obtained from an investment or participation in a financial instrument or transaction referencing the Index. Neither Solactive AG nor Goldman Sachs provide assurance or guarantee that the products linked to the Index will operate or would have operated in the past in a manner consistent with these materials. The hypothetical historical levels presented herein have not been verified by an independent third party, and such hypothetical historical levels have inherent limitations. Alternative simulations, techniques, modeling or assumptions might produce significantly different results and prove to be more appropriate. Actual results will vary, perhaps materially, from the simulated returns presented in this document. See the Disclaimer Language for more information on Back-testing.

Alternative simulations, techniques, modeling or assumptions might produce significantly different results and prove to be more appropriate. Actual results will vary, perhaps materially, from the simulated returns presented in this document. See the Disclaimer Language for more information on Back-testing.

³ Effective Performance is calculated as the point to point return over the period. For the GS Multi Asset Class Index performance statistics: 1M Initial Level = 207.12, Final Level = 209.73, 6M Initial Level = 207.25, Final Level = 209.73, 1Y Initial Level = 205.03, Final Level = 209.73, 3Y Initial Level = null, Final Level = 209.73, 5Y Initial Level = null, Final Level = 209.73.

⁴ Calculated on a per annum percentage basis.

⁵ Calculated on the same basis as realized volatility used in calculating the index.

⁶ Calculated by dividing the annualized performance by the annualized realized volatility since August 2014.

⁷ The largest percentage decline experienced in the relevant measure from a previously occurring maximum level.

DISCLAIMER LANGUAGE

The GS-Momentum Builder strategy is a momentum driven strategy, aiming to capture trends in the market by using historical data over a predefined horizons (e.g. 9 months, 6 months and 3 months). Despite past simulations, there is no guarantee that the strategy will be able to capture trends effectively, or that the chosen horizon will still be relevant in the future.

There is no guarantee that the strategy will not underperform some or all of the underlying assets. In particular, GS-Momentum Builder may have a significant weight in one of those assets at the time of a sudden drop, or no exposure to one of those underlyings at a time it has a strong performance.

Different strategies with a different set of underlying assets may significantly outperform the selected strategy.

For parts of the backtesting period, the underlying assets showed in this presentation have had strong performances. Backtested and past performance figures are not a reliable indicator or guarantee of future results.

The strategy is not actively managed and GS does not exercise discretion in constructing, calculating or executing the strategy. For further information and disclosure about the strategy, including relevant risk factors, please refer to the related transaction documentation.

The index was launched on July 25, 2014.

The US Equity Futures Rolling Strategy Index, Japanese Equity Futures Rolling Strategy Index, Japanese Government Bond Futures Rolling Strategy, the US Government Bond Futures Rolling Strategy Index and European Government Bond Futures Rolling Strategy Index (collectively, the "Index") are the exclusive property of Goldman Sachs International, which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) ("S&P Dow Jones Indices") to calculate and maintain the Index based on objective pre-agreed methodology. S&P® is a registered trademark of Standard & Poor's Financial Services LLC ("SPFS"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and, these trademarks have been licensed to S&P Dow Jones Indices. Neither S&P Dow Jones Indices, SPFS, Dow Jones nor any of their affiliates sponsor and promote the Index and none shall be liable for any errors or omissions in calculating the Index.

Goldman Sachs International has contracted with STOXX Limited, Zurich, Switzerland ("STOXX") to maintain and calculate the European Equity Futures Rolling Strategy Index ("Index"). STOXX and its licensor Dow Jones & Company, Inc., a Delaware corporation, New York, USA, do not have any legal obligations towards the purchasers of the financial product linked to the Index ("Financial Product") and cannot be held liable for any losses or damages which relate to investments in the Financial Product. Purchasers of the Financial Product are made aware and accept that index calculations are based on large quantities of data provided by third parties and are thus susceptible to errors and delays. This may result in errors and delays in the Index which may have an impact on the Financial Product.

"Bloomberg®", "Bloomberg Gold Subindex Total Return" and "Bloomberg WTI Crude Oil Subindex Total Return" are service marks of Bloomberg Finance L.P. and its affiliates (collectively, "Bloomberg") and have been licensed for use for certain purposes by Goldman Sachs. Neither Bloomberg nor UBS Securities LLC and its affiliates (collectively, "UBS") are affiliated with Goldman Sachs, and Bloomberg and UBS do not approve, endorse, review, or recommend any products linked to the GS Momentum Builder® Multi-Asset Class Index. Neither Bloomberg nor UBS guarantees the timeliness, accurateness, or completeness of any data or information relating to the Bloomberg Commodity Index or any Goldman Sachs index.
