INTRODUCTION

This document (the "**GUIDELINE**") is to be used as a guideline with regard to the composition, calculation and maintenance of the SOLACTIVE L&G ETF NEW GLOBAL THEMATIC INDEX (the "**INDEX**"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered and published by Solactive AG ("**SOLACTIVE**") assuming the role as administrator (the "**INDEX ADMINISTRATOR**") under the Regulation (EU) 2016/1011 (the "**BENCHMARK REGULATION**" or "**BMR**"). The name "Solactive" is trademarked.

The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

1. INDEX SPECIFICATIONS

1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Equity
Strategy	Representation of ETFs from the L&G ETF universe, weighted to minimize volatility subject to risk-parity and turnover controls
Regional Allocation	Global
Rebalancing Fee	-
Rebalancing Frequency	Quarterly

1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive L&G Focused Multi-Thematic Index PR	DE000SLOLJ91	USD	PR*	.SOLGFTDP	
Solactive L&G Focused Multi-Thematic Index NTR	DE000SLOLKA0	USD	NTR*	.SOLGFTDN	SOLGFTDN
Solactive L&G Focused Multi-Thematic Index TR	DE000SLOLKB8	USD	GTR*	.SOLGFTDT	

*PR, NTR, GTR means that the INDEX is calculated as price return, net total return, gross total return. INDEX as described in the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on the 08/05/2006, the START DATE, is 1000. Historical values from the 24/01/2024, the LIVE DATE, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back-tested or proxied¹.

1.4. PRICES AND CALCULATION FREQUENCY

The level of the INDEX is calculated on each CALCULATION DAY from 9:00 a.m. to 10:50 p.m. CET based on the TRADING PRICES on the EXCHANGES on which the INDEX COMPONENTS are listed. TRADING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current TRADING PRICE for an INDEX COMPONENT, the later of: (i) the most recent CLOSING PRICE; or (ii) the last available TRADING PRICE for the preceding TRADING DAY is used in the calculation.

In addition to the intraday calculation a closing level of the INDEX for each CALCULATION DAY is also calculated. This closing level is based on the CLOSING PRICES for the INDEX COMPONENTS on the respective EXCHANGES on which the INDEX COMPONENTS are listed. The CLOSING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the 04:00 p.m. London time rates provided by WM/ Refinitiv (the "WM/ Refinitiv Rate"). If there is no 04:00 p.m. London time WM/ Refinitiv Rate for the relevant CALCULATION DAY, the last available 04:00 p.m. London time WM/ Refinitiv Rate will be used for the closing level calculation.

1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE.

¹ The INDEX UNIVERSE, listed in Appendix 7.1, was used for the back-test of levels after 18/04/2019. In case an INDEX COMPONENT has no price history for period after 18/04/2019, the performance was proxied with the returns of the respective underlying equity index. Due to lack of data for periods prior to 18/04/2019, the historical levels were calculated using the returns of the Solactive GBS Developed Markets Large & Mid Cap USD Index. This means no historical selection of INDEX COMPONENTS was performed to derive the levels prior to 18/04/2019.

2. INDEX SELECTION

On each SELECTION DAY, the INDEX ADMINISTRATOR will revise the composition of the INDEX.

In a first step, the SELECTION PARTY determines the INDEX UNIVERSE in accordance with Section 2.1. The INDEX UNIVERSE comprises all those financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS (as specified in Section 2.1) and will constitute a starting pool from which the components of the INDEX will be selected. Based on this INDEX UNIVERSE, the new composition of the INDEX will be determined by applying the rules outlined in Section 2.2.

Each new INDEX COMPONENT will be assigned a weight as described in Section 2.3.

2.1. INDEX UNIVERSE REQUIREMENTS

The INDEX UNIVERSE is comprised of all financial instruments which fulfill the below requirements (the "**INDEX UNIVERSE REQUIREMENTS**"):

All thematic equity ETFs ("Thematic ETF") managed by LGIM Managers (Europe) Limited, as published at the below link, or any successor thereof:

For UK Adviser/Wealth Manager: <https://fundcentres.lgim.com/en/uk/adviser-wealth/fund-centre/etf?assetClass=Equity&strategy=Thematic>.

For Italian Adviser/Wealth Manager: <https://fundcentres.lgim.com/en/it/adviser-wealth/fund-centre/ETF/?strategy=Thematic&assetClass=Equity#AssetClass=Equity&Strategy=Thematic>.

To clarify any Multi-Thematic ETF product bundling at least two or more different themes in a single ETF shall not be part of the INDEX UNIVERSE.

The determination of the INDEX UNIVERSE is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decisions.

2.2. SELECTION OF THE INDEX COMPONENTS

Based on the INDEX UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the SELECTION DAY in accordance with the following rules (the "**INDEX COMPONENT REQUIREMENTS**"):

Eligibility of a Thematic ETF from the INDEX UNIVERSE is determined based on the below criteria:

- > Track Record: The Thematic ETF has a live track record of at least one year.
- > Thematic Similarity: If two or more Thematic ETFs target the same or a very similar theme then the Thematic ETF with the lower / lowest total expense ratio (TER) shall be eligible only.

- > Stage of theme: A Thematic ETF whose theme is deemed to be in its early stages of evolution is not eligible for inclusion. The stage of evolution is assessed by the ETF Investments team of the SELECTION PARTY based on one or more of at least two of the following factors: market size, investible universe, economics, market uncertainty amongst others.

All remaining Thematic ETFs are then assessed based on the following framework:

- > Performance Metric:
 - Measuring the relative price performance of the Thematic ETFs over a three and six month period. A higher price performance results in a better performance metric of the respective Thematic ETF.
- > Fundamental Metric
 - Evaluating a theme based on fundamentals such as, but not limited to, relative valuations and sales forecasts.
 - The lower the price to earnings valuation measured against a broad traditional equity benchmark and against its historical relative price to earnings valuation levels, the better the fundamental metric.
 - The higher the growth forecast, the better the fundamental metric.
- > Diversification Metric:
 - Measuring Thematic ETFs overall level of diversification which includes, but is not limited to, looking at its revenue diversification as well as its small and mid-cap exposure.
 - A higher small- and mid- cap exposure results in more diversification and a better diversification metric.
 - The less concentrated the revenues, the higher the diversification and the better the diversification metric.

Within each megatrend as defined in Appendix 7.1. two Thematic ETFs per megatrend are selected for inclusion into the INDEX based on the above framework. This is done by combining the Performance, Fundamental and Diversification metrics of each ETF to form an aggregated Thematic metric.

INDEX COMPONENTS are all the eligible Thematic ETFs, as determined on any SELECTION DAY in April and October each year. The INDEX COMPONENTS shall remain the same on any other SELECTION DAY in each year. Unless there is a fund closure/merger of a Thematic ETF which is also an INDEX COMPONENT between the April and July SELECTION DAY or between the October and January SELECTION DAY, the next following Thematic ETF within such megatrend as determined based on the above framework will be included on such following SELECTION DAY.

The INDEX ADMINISTRATOR has outsourced the selection of the INDEX COMPONENTS to the SELECTION PARTY. Such outsourcing has been made in accordance with the requirements of the BMR (Article 10 BMR). Any discretionary decision of the SELECTION PARTY will be made in accordance with the specifications regarding the exercise of discretion or expert judgement established by the INDEX ADMINISTRATOR.

2.3. WEIGHTING OF THE INDEX COMPONENTS

On each SELECTION DAY each INDEX COMPONENT is assigned a weight following a two steps process.

In a first step, each INDEX COMPONENT is assigned a weight in order to minimize volatility while maintaining a maximum deviation of 30% from each component's risk-parity weight, a weight cap of 20%, a weight floor of 10% and a maximum two-way turnover of 20% compared to the current INDEX COMPONENT weights.

The process is performed using the following formulas:

$$\text{Minimize: } \frac{\sigma(w_t, t)}{\sigma^{\text{orthogonal}}(w_t, t)}$$

Subject to

$$\sum_{i=1}^n |w_{i,t} - w_{i,t-1}| \leq 0.2$$

and

$$\text{Max} \{(1 - 0.3) \times w_{i,t}^0, 0.10\} \leq w_{i,t} \leq \text{Min} \{(1 + 0.3) \times w_{i,t}^0, 0.20\}$$

for

$$w_{i,t}^0 = \frac{1}{\sqrt{\text{var}_{i,t}}}$$

Where:

w_t is a vector of weights, each of which corresponds to an INDEX COMPONENT and is defined as $w_t = (w_{1,t}, w_{2,t}, \dots, w_{n,t})$.

$\sigma(w_t, t)$ is, in respect of a portfolio with vector of INDEX COMPONENTS weights w_t and Selection Date t , the risk of the portfolio measured in terms of the portfolio volatility and determined as:

$$\sigma(w_t, t) = \sqrt{w_t^T \Sigma_t w_t}$$

Where:

Σ_t is the annualized covariance matrix of the INDEX COMPONENTS daily returns at SELECTION DAY t . The covariance matrix and returns calculations are based on a 2520 business days lookback period.²

$\sigma^{orthogonal}(w_t, t)$ is in respect of a vector of INDEX COMPONENTS weights w_t and Selection Date t , the risk of a hypothetical orthogonal portfolio assuming all INDEX COMPONENTS are uncorrelated (i.e., individual correlations are assumed to be zero).

If no weight allocation is possible based on the above framework the turnover is increased until a solution is found.

In a second step, taking into account the maximum weight cap and the weight floor as defined above the following process is performed:

- Any weight shall not deviate more than 30% relative to its current weight in the INDEX unless it is a new INDEX COMPONENT, where this rule shall not be applicable. If the weight deviation as determined based on the optimization process above indicates more than 30% relative deviation from the current weight, then only a maximum relative weight deviation of 30% is allowed.
- If an optimized weight shows a relative deviation to the current weight in the Index lower than 10%, the current weight is assigned to that INDEX COMPONENT (such weight shall also not be affected by any further redistributions).

Any excess / missing weight shall be redistributed amongst all remaining INDEX COMPONENTS.

In case no solution can be found, the weights as determined when the iterative process above stops because no solution can be found are used. Such weights are scaled up or down to 100% if necessary.

²In case of historic periods with no price history for an INDEX COMPONENT, the returns of the respective underlying equity index are used instead.

3. REBALANCE

3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the weights as determined on the SELECTION DAY.

For more information on the rebalance procedure please refer to the Equity Index Methodology, which is incorporated by reference and available on the Solactive website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE website under the section "Announcement", which is available at <https://www.solactive.com/news/announcements/>.

3.2. EXTRAORDINARY REBALANCE

The INDEX is not rebalanced extraordinarily.

4. CALCULATION OF THE INDEX

4.1. INDEX FORMULA

The INDEX is calculated as a price return, net total return, gross total return Index.

The calculation is performed according to the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. The divisor index formula stipulates that the level of the INDEX changes based on the change of the prices of its INDEX COMPONENTS taking into account their weight in the INDEX and any currency conversion in case the price of an INDEX COMPONENT is quoted in a currency other than the INDEX CURRENCY.

Any dividends or other distributions are reinvested across the entire basket of INDEX COMPONENTS by means of a divisor at the opening of the effective date (the so-called ex-date) of the payment of such dividend or other distribution.

A more detailed description of the mechanics of the index calculation formula can be found in the Equity Index Methodology under Section 1.2.

4.2. ACCURACY

The level of the INDEX will be rounded to two decimal places. Divisors will be rounded to six decimal places. TRADING PRICES and foreign exchange rates will be rounded to six decimal places.

4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Such adjustment has to be made if a corporate action (as specified in Section 4.4 below) in relation of an INDEX COMPONENT occurs. Such adjustment may have to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX COMPONENTS and will be made in compliance with the Solactive Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will announce the INDEX adjustment giving a notice period of at least two TRADING DAYS (with respect to the affected INDEX COMPONENT) on the SOLACTIVE website under the Section "Announcements", which is available at <https://www.solactive.com/news/announcements/>. The INDEX adjustments will be implemented on the effective day specified in the respective notice.

4.4. CORPORATE ACTIONS

As part of the INDEX maintenance SOLACTIVE will consider various events – also referred to as corporate actions – which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Equity Index Methodology with the exception of section 2.1.4 (RIGHTS ISSUE) and section 2.1.5 (CAPITAL DECREASE), which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables. For RIGHTS ISSUES and CAPITAL DECREASES the treatment described in sections 4.4.1 and 4.4.2 applies.

While SOLACTIVE aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Equity Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

SOLACTIVE considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- > Cash Distributions (e.g. payment of a dividend)
- > Stock distributions (e.g. payment of a dividend in form of additional shares)
- > Stock distributions of another company (e.g. payment of a dividend in form of additional shares of another company (e.g. of a subsidiary))
- > Share splits (company's present shares are divided and therefore multiplied by a given factor)
- > Reverse splits (company's present shares are effectively merged)
- > Capital increases (such as issuing additional shares)
- > Share repurchases (a company offer its shareholders the option to sell their shares to a fixed price)
- > Spin-offs (the company splits its business activities into two or more entities and distributes new equity shares in the created entities to the shareholders of the former entity)
- > Mergers & Acquisitions (transaction in which the ownership of a company (or other business organizations) are transferred or consolidated with other entities, e.g. fusion of two or more separate companies into one entity)
- > Delistings (company's shares are no longer publicly traded at a stock exchange)

- > Nationalization of a company (effective control of a legal entity is taken over by a state)
- > Insolvency

4.4.1 Rights Issue (Capital Increase)

A RIGHTS ISSUE raises the MARKET CAPITALIZATION of a company, shareholders receive the right to pre-purchase newly issued shares for a pre-defined subscription price (“**SP**”) on a pro rata basis, i.e., in accordance with their existing number of the company's shares.

The price adjustment factor (“**PAF**”) for a RIGHTS ISSUE is calculated as follows:

$$PAF_{i,t+1} = \frac{p_{i,t}}{\left(\frac{1 * p_{i,t} + T * SP}{1 + T}\right)}$$

with:

<i>PAF</i>	price adjustment factor
<i>P_{i,t}</i>	Price of INDEX COMPONENT <i>i</i> on TRADING DAY <i>t</i>
<i>T</i>	issue terms
<i>SP</i>	subscription price

The theoretical close price after a RIGHTS ISSUE is calculated as follows:

$$ap_{i,t+1} = \frac{p_{i,t}}{PAF_{i,t+1}}$$

with:

<i>ap</i>	adjusted price
-----------	----------------

The number of shares prior to the ex-date is increased with the PAF. Following that, a RIGHTS ISSUE does not affect the INDEX market capitalization and no divisor change is implemented.

$$ax_{i,t+1} = x_{i,t} * PAF_{i,t+1}$$

with:

<i>ax</i>	adjusted fraction of shares
-----------	-----------------------------

4.4.2 Capital decrease

The opposite procedure to a RIGHTS ISSUE which increases capital is a CAPITAL DECREASE. A company may offer its shareholders the option to sell their shares at an agreed price.

The price adjustment factor ("PAF") for a CAPITAL DECREASE is calculated as follows:

$$PAF_{i,t+1} = \frac{p_{i,t}}{\left(\frac{1 * p_{i,t} - T * SP}{1 - T}\right)}$$

with:

PAF	price adjustment factor
$P_{i,t}$	price of INDEX COMPONENT i on TRADING DAY t
T	issue terms
SP	subscription price

The theoretical close price after a CAPITAL DECREASE is calculated as follows:

$$ap_{i,t+1} = \frac{p_{i,t}}{PAF_{i,t+1}}$$

with:

ap	adjusted price
------	----------------

The number of shares prior to the ex-date is decreased with the PAF. Following that, a CAPITAL DECREASE does not affect the INDEX market capitalization and no divisor change is implemented.

$$ax_{i,t+1} = x_{i,t} * PAF_{i,t+1}$$

with:

ax	adjusted fraction of shares
------	-----------------------------

4.5. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as

the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

4.6. MARKET DISRUPTION

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the Solactive Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

5. MISCELLANEOUS

5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

For the INDEX, a SELECTION PARTY is used. The determinations of the INDEX COMPONENTS are subject to decisions of the SELECTION PARTY where the exercise of discretion is needed. The SELECTION PARTY has confirmed that such discretionary decision is performed in accordance with the specifications established by the INDEX ADMINISTRATOR.

5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "[Announcement](https://www.solactive.com/news/announcements/)", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will

take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the "**OVERSIGHT COMMITTEE**") is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

6. DEFINITIONS

“**BENCHMARK REGULATION**” shall have the meaning as defined in Section “Introduction”.

“**BMR**” shall have the meaning as defined in Section “Introduction”.

“**BUSINESS DAY**” is a day on which the London Stock is open for general business.

“**CALCULATION DAY**” is every weekday from Monday to Friday.

“**CAPITAL DECREASE**” shall have the meaning as defined in Section 3 of the Equity Index Methodology, which is available on the Solactive website: <https://www.solactive.com/documents/equity-index-methodology/>.

“**CLOSE OF BUSINESS**” is the calculation time of the closing level of the INDEX as outlined in Section 1.4.

The “**CLOSING PRICE**” in respect of an INDEX COMPONENT and a TRADING DAY is a security's final regular-hours TRADING PRICE published by the EXCHANGE and determined in accordance with the EXCHANGE regulations. If the EXCHANGE has no or has not published a CLOSING PRICE in accordance with the EXCHANGE rules for an INDEX COMPONENT, the last TRADING PRICE will be used.

“**EXCHANGE**” is with respect to the INDEX and every INDEX COMPONENT, the respective exchange where the INDEX COMPONENT has its listing as determined in accordance with the rules in Section 2.

“**GUIDELINE**” shall have the meaning as defined in Section “Introduction”.

“**INDEX**” shall have the meaning as defined in Section “Introduction”.

“**INDEX ADMINISTRATOR**” shall have the meaning as defined in Section “Introduction”.

“**INDEX COMPONENT**” is each eligible Thematic ETF as defined in section 2.2.

“**INDEX COMPONENT REQUIREMENTS**” shall have the meaning as defined in Section 2.2.

“**INDEX CURRENCY**” is the currency specified in the column “Currency” in the table in Section 1.2.

“**INDEX UNIVERSE REQUIREMENTS**” shall have the meaning as defined in Section 2.1.

“**INDEX UNIVERSE**” is the sum of all financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS.

“**LIVE DATE**” shall have the meaning as defined in Section 1.3.

“**OVERSIGHT COMMITTEE**” shall have the meaning as defined in Section 5.5.

“**REBALANCE DAY**” is the third Friday in January, April, July and October. If that day is not a BUSINESS DAY, the REBALANCE DAY will be the immediately following BUSINESS DAY.

“**RIGHTS ISSUE**” shall have the meaning as defined in Section 3 of the Equity Index Methodology, which is available on the Solactive website: <https://www.solactive.com/documents/equity-index-methodology/>.

“**SELECTION DAY**” is the first BUSINESS DAY of January, April, July and October, disregarding any potential change of the REBALANCE DAY.

“**SELECTION PARTY**” is Legal & General Investment Management.

"SOLACTIVE" shall have the meaning as defined in Section "Introduction".

"START DATE" shall have the meaning as defined in Section 1.3.

"TRADING DAY" is with respect to an INDEX COMPONENT included in the INDEX at the REBALANCE DAY and every INDEX COMPONENT included in the INDEX at the CALCULATION DAY immediately following the REBALANCE DAY (for clarification: this provision is intended to capture the TRADING DAYS for the securities to be included in the INDEX as new INDEX COMPONENTS with close of trading on the relevant EXCHANGE on the REBALANCE DAY) a day on which the relevant EXCHANGE is open for trading (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the scheduled EXCHANGE closing time and days on which the EXCHANGE is open for a scheduled shortened period. The INDEX ADMINISTRATOR is ultimately responsible as to whether a certain day is a TRADING DAY.

The **"TRADING PRICE"** in respect of an INDEX COMPONENT and a TRADING DAY is the most recent published price at which the INDEX COMPONENT was traded on the respective EXCHANGE.

"WM / REFINITIV RATE" shall have the meaning as defined in Section 1.4.

7. APPENDIX

7.1 INITIAL INDEX -UNIVERSE AND MEGATREND CLASSIFICATION

This table shows the INDEX UNIVERSE. Note that this universe may change over time. Please refer to the link as provided in section 2.1. above to see a list of all Thematic ETFs.

ETF Name	ISIN	Megatrend
L&G Clean Water UCITS ETF	IE00BK5BC891	Energy & Resources
L&G Battery Value-Chain UCITS ETF	IE00BF0M2Z96	Energy & Resources
