L'INDICE ETHICAL EUROPE EQUITY

DÉCLARATION DE CERTIFICATION 3^{ème} TRIMESTRE 2020

Aux utilisateurs de l'Indice,
Au fournisseur de l'Indice Solactive AG:

Forum ETHIBEL asbl¹ a été chargé par Solactive AG d'effectuer un contrôle indépendant et une certification de l'indice Ethical Europe Equity (SOLEEE Index) portant sur le respect des aspects non financiers de son cahier des charges ainsi que la diligence raisonnable du processus de composition de l'Indice.

Objectif de l'Indice

Sélection univers de composants. L'Indice Ethical Europe Equity est composé d'actions des entreprises appartenant au Registre Ethibel® Excellence Europe, ou dérivé de l'univers de recherche ESG de of Vigeo Eiris¹.

Critères ESG. Dans les deux cas, les composants bénéficient d'un score ESG (Environnement, Social, Gouvernance) global (i) égal ou supérieur à 40/100 et (ii) supérieure à la moyenne du secteur, à la date de publication.

Critères éthiques. Les composants qui n'appartiennent pas au Registre Ethibel: (i) ont pas de participations significatives dans des activités liées à l'armement, aux jeux d'argent, au tabac et aux activités nucléaires et (ii) ne sont pas impliqués dans des violations des normes relatives à l'environnement, au travail ou aux droits de l'homme.

Modalités opérationnelles. Solactive et Vigeo Eiris se sont entendus sur un scénario de livraison mensuelle de l'univers éligible et de mise à jour trimestrielle de la composition de l'Indice. À cette occasion, l'éventuelle implication des sociétés concernées dans les activités contestables ou dans des violations liées aux critères éthiques est examinée. Les composants qui ne respectent plus les critères sont exclus de l'indice. Solactive publie chaque mise à jour de l'Indice, après vérification et certification de Forum ETHIBEL.

Conclusion

En référence à la date d'ajustement du 6 juillet 2020 et sur base de la liste des services d'audit ci-dessus, nous déclarons que l'**Indice Ethical Europe Equity** a été révisé en conformité avec les stipulations des critères ESG et éthiques ainsi que les modalités opérationnelles, définies dans le cahier des charges de l'Indice. Cependant, une entreprise, Swedbank, ne correspond pas complètement tous les critères. Le score ESG de cette entreprise est égal à sa moyenne sectorielle alors que la réglementation impose un score supérieur à la moyenne sectorielle.
