INTRODUCTION

This document (the "GUIDELINE") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive Development Bank Bond Index Family (the "INDEX"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered and published by Solactive AG ("SOLACTIVE") assuming the role as administrator (the "INDEX ADMINISTRATOR") under the Regulation (EU) 2016/1011 (the "BENCHMARK REGULATION" or "BMR"). The name "Solactive" is trademarked.

The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to ISSUERS – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

1. INDEX SPECIFICATIONS

1.1. SCOPE OF THE INDEX

- The Solactive Development Bank Bond USD TR Index is a rules-based, market value weighted index engineered to mirror the performance of the USD-denominated bonds issued by entitled development banks.
- The Solactive Development Bank Bond USD 1-5 TR Index is a maturity subindex of the Solactive Development Bank Bond USD TR Index. The Index is designed to replicate the 1 to 5 years maturity band of the base index. Solactive Development Bank Bond CHF 1-5 TR Index is version of Solactive Development Bank Bond USD TR Index converted to CHF.
- The Solactive Development Bank Bond USD 5-10 TR Index is a maturity subindex of the Solactive Development Bank Bond USD TR Index. The Index is designed to replicate the 5 to 10 years maturity band of the base index.
- The Solactive Global Multilateral Development Bank Bond USD TR Index is a rules-based, market value weighted index engineered to mirror the performance of the USD-denominated bonds issued by entitled multilateral development banks.
- The Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index is a maturity subindex of the Solactive Global Multilateral Development Bank Bond USD TR Index. The Index is designed to replicate the 1 to 5 years maturity band of the base index. The Solactive Global Multilateral Development Bank Bond CHF 1-5 TR Index, the Solactive Global Multilateral Development Bank Bond GBP 1-5 TR Index, the Solactive Global Multilateral Development Bank Bond EUR 1-5 TR Index are versions of the Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index converted to CHF, GBP and EUR, respectively.
- The Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index is a maturity subindex of the Solactive Global Multilateral Development Bank Bond USD TR Index. The Index is designed to replicate the 5 to 10 years maturity band of the base index. The Solactive Global Multilateral Development Bank Bond CHF 5-10 TR Index, the Solactive Global Multilateral Development Bank Bond GBP 5-10 TR Index, the Solactive Global Multilateral Development Bank Bond EUR 5-10 TR Index are versions of the Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index converted to CHF, GBP and EUR, respectively.
- The Solactive World Bank Bond USD TR Index is a rules-based, market value weighted index engineered to mirror the performance of the USD-denominated bonds issued by the International Bank for Reconstruction and Development (IBRD).
- The Solactive World Bank Bond USD 1-5 TR Index is a maturity subindex of the Solactive World Bank Bond USD TR Index. The Index is designed to replicate the 1 to 5 years maturity band of the base index.

- The Solactive World Bank Bond USD 5-10 TR Index is a maturity subindex of the Solactive World Bank Bond USD TR Index. The Index is designed to replicate the 5 to 10 years maturity band of the base index.
- Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index is a version of Solactive Development Bank Bond USD TR Index with additional constraints: issuer weight is capped at 25%. Solactive Global Multilateral Development Bank Bond GBP 25% Issuer Capped TR Index is a version of Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index converted to GBP. Depending on the number of issuers, the following capping will be implemented:

Number of issuers	Capping issuer level	Capping issue level
More than 4	25%	Minimum amount of 6 different issues is required
4	30%	Minimum amount of 6 different issues is required
3	40%	Individual issue cannot exceed 30%, and minimum amount of 6 different issues is required
2	60%	Individual issue cannot exceed 30%, and minimum amount of 6 different issues is required
1	n.a.	Individual issue cannot exceed 30%. and minimum amount of 6 different issues is required

- The Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index (MDBS46) is derived from the Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index (MDBS5) and the Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index (MDBS10). The MDBS46 subindex restricts a total weight of constituents of MDBS5 to 40% and of MDBS10 to 60%, respectively. The weight within the splits is distributed on pro rata basis.
- The hedged version of the index is available. For the hedging methodology, please consult the "Currency-hedged Indices Methodology" document, which is available on the <http://www.solactive.com> website.

1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive Development Bank Bond USD TR Index	DE000SLA5SZ1	USD	TR	.DEVS	DEVS
Solactive Development Bank Bond USD 1-5 TR Index	DE000SLA5S40	USD	TR	.DEVS5	DEV5
Solactive Development Bank Bond CHF 1-5 TR Index	DE000SLA5S57	CHF	TR	.DEVSCH5	
Solactive Development Bank Bond USD 5-10 TR Index	DE000SLA5S81	USD	TR	.DEVS10	DEVS10
Solactive Global Multilateral Development Bank Bond USD TR Index	DE000SLA5TC8	USD	TR	.MDBS	MDBS
Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index	DE000SLA5TG9	USD	TR	.MDBS5	MDBS5
Solactive Global Multilateral Development Bank Bond CHF 1-5 TR Index	DE000SLA5TH7	CHF	TR	.MDBSCH5	
Solactive Global Multilateral Development Bank Bond GBP 1-5 TR Index	DE000SLA5TJ3	GBP	TR	.MDBSGB5	
Solactive Global Multilateral Development Bank Bond EUR 1-5 TR Index	DE000SLA5TK1	EUR	TR	.MDBSEU5	
Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index	DE000SLA5TL9	USD	TR	.MDBS10	MDBS10
Solactive Global Multilateral Development Bank Bond CHF 5-10 TR Index	DE000SLA5TM7	CHF	TR	.MDBSC10	
Solactive Global Multilateral Development Bank Bond GBP 5-10 TR Index	DE000SLA5TN5	GBP	TR	.MDBSG10	
Solactive Global Multilateral Development Bank Bond EUR 5-10 TR Index	DE000SLA5TP0	EUR	TR	.MDBSE10	
Solactive World Bank Bond USD TR Index	DE000SLA5TQ8	USD	TR	.WBANK	WBANK
Solactive World Bank Bond USD 1-5 TR Index	DE000SLA5TW6	USD	TR	.WBANK5	WBANK5
Solactive World Bank Bond USD 5-10 TR Index	DE000SLA5K06	USD	TR	.WBANK10	WBANK10

Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index	DE000SLA57J5	USD	TR	.MDBS25	MDBS25
Solactive Global Multilateral Development Bank Bond GBP 25% Issuer Capped TR Index	DE000SLA9TD8	GBP	TR	.MDBS25GBP	
Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index	DE000SLA6P75	USD	TR	.MDBS46	MDBS46

+TR means that the INDEX is calculated as Total Return index, and PR means that the INDEX is calculated as Price Return as described in the Bond Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>.

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

1.3. INITIAL LEVEL OF THE INDEX

Total Return versions of the Solactive Development Bank Bond Index Family will be calculated every Business Day starting on the 13th of April 2018.

Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index will be calculated every Business Index Guideline 12 Day starting on the 31st of July 2018. Before this date the index levels are backfilled until the 30th of December 2011, with the index level based on 1000 as at the close of trading on 30th of December 2011.

Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index will be calculated every Business Day starting on the 1st of October 2018. Before this date the index values are backfilled until the 30th of December 2011, with the index values based on 1000 as at the close of trading on 30th of December 2011.

Historical values from the LIVE DATE will be recorded in accordance with Article 8 of the BMR.

1.4. PRICES AND CALCULATION FREQUENCY

The INDEX is calculated and distributed once every BUSINESS DAY based on the EVALUATED BID PRICES of the INDEX COMPONENTS. Bonds added in a rebalancing (see Section 3) are included the INDEX at the EVALUATED ASK PRICE on the relevant REBALANCE DAY (as specified in Section 3). INDEX analytical values are calculated each BUSINESS DAY using the LAST EVALUATED PRICE based on FIXING TIME.

Should there be no current EVALUATED PRICE available on Intercontinental Exchange ("ICE") the most recent EVALUATED PRICE on Intercontinental Exchange ("ICE") for the preceding BUSINESS DAY is used in the calculation.

1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by Solactive.

2. INDEX SELECTION

On each SELECTION DAY, all bonds which meet the INDEX COMPONENT REQUIREMENTS are eligible for inclusion in the INDEX and will be added as INDEX COMPONENT on the REBALANCE DAY. Additionally, on each SELECTION DAY, it will be evaluated whether all current INDEX COMPONENTS still meet the INDEX COMPONENT REQUIREMENTS. Each INDEX COMPONENT that does not meet the INDEX COMPONENT REQUIREMENTS will be removed from the INDEX on the next REBALANCE DAY.

2.1. SELECTION OF THE INDEX COMPONENTS

The initial composition of each INDEX, as well as any selection for a rebalance (as specified in Section 3) is determined using the following rules:

- Issuer requirements for the Solactive Development Bank Bond subindices:
 - The issuer must be a Development Bank.
 - The issuer must have a rating of AA- (S&P) or Aa3 (Moody's) and higher. If several ratings are available, the lowest rating is considered.
 - The issuer requirements are reviewed on the annual basis. The issuer selection will be performed during October with the changes effective on the corresponding Rebalancing Day (November Selection Pool will be based on the new issuer list).
- Issuer requirements for the Solactive Global Multilateral Development Bank Bond subindices:
 - The issuer must be a Multilateral Development Bank.
 - The issuer must have a rating of AA- (S&P) or Aa3 (Moody's) and higher. If several ratings are available, the lowest rating is considered.
 - The issuer requirements are reviewed on the annual basis. The issuer selection will be performed during October with the changes effective on the corresponding Rebalancing Day (November Selection Pool will be based on the new issuer list).
- Issuer requirements for the Solactive World Bank Bond subindices:
 - The only eligible Issuer is The International Bank for Reconstruction and Development (IBRD).
- Bonds should be denominated in US dollars (USD).
- Minimum amount outstanding of 500 million USD is required.
- Fixed rated bonds are eligible for inclusion. For the avoidance of doubt only bonds that have a fix constant coupon over the lifetime of the bond are eligible while bonds that have a fixed coupon schedule with different coupon values are excluded (e.g. step up bonds).
- Dual currency notes, convertible bonds, callable bonds and inflation linked bonds are excluded.
- Domestic market bonds and private placements are excluded.

- Maturity type eligible for inclusion is "Bullet".
- Time to Maturity is required to be not less than 12 months.
- For the all subindices with maturity span of 1-5 (Solactive Development Bank Bond USD 1-5 TR Index, Solactive Development Bank Bond CHF 1-5 TR Index, Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index, Solactive Global Multilateral Development Bank Bond CHF 1-5 TR Index, Solactive Global Multilateral Development Bank Bond GBP 1-5 TR Index, Solactive Global Multilateral Development Bank Bond EUR 1-5 TR Index, Solactive World Bank Bond USD 1-5 TR Index time to maturity should be not less than 1 year and below 5 years.
- For all subindices with maturity span of 5-10 (Solactive Development Bank Bond USD 5-10 TR Index, Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index, Solactive Global Multilateral Development Bank Bond CHF 5-10 TR Index, Solactive Global Multilateral Development Bank Bond GBP 5-10 TR Index, Solactive Global Multilateral Development Bank Bond EUR 5-10 TR Index, Solactive World Bank Bond USD 5-10 TR Index time to maturity should be not less than 5 years and below 10 years.
- For Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index time to maturity should be not less than 1 year and below 10 years.
- If two or more identical bonds qualify the following rules are considered in order to avoid double-inclusion:
 - RegS issues are preferred over 144A
 - Series 1A issues are preferred over other series
 - Bonds issued with a series are preferred over bonds without a specific series

A price from the PRICING PROVIDER must be available for each INDEX COMPONENT on each SELECTION DAY.

(the "INDEX COMPONENT REQUIREMENTS")

2.2. WEIGHTING OF THE INDEX COMPONENTS

The Index Components are weighted according to their respective Market Value in proportion to the aggregated Market Value of all Index Components in the index, whereas no additional weight constraints are applied. The exception is Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index that imposes additional constraints: maximum of 25% allocated to a single issuer, 30% allocated to a single issue. In case any of the constraints stated are breached then weight is redistributed on the pro-rata basis to other constituents to meet the requirements outlined. Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index restricts a total weight of constituents of Solactive Global Multilateral Development Bank Bond USD 1-5 TR Index to 40% and total weight of constituents of Solactive Global Multilateral Development Bank Bond USD 5-10 TR Index to 60%, respectively. The weight within the splits is distributed on pro-rata basis.

3. REBALANCE

3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

For more information on the rebalance procedure please refer to the Bond Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE website under the section "[Announcement](#)", which is available at <https://www.solactive.com/news/announcements/>

3.2. EXTRAORDINARY REBALANCE

In addition to the ordinary rebalance, the INDEX is also rebalanced extraordinarily. These adjustments take place outside the rebalancing schedule and follow different rules than the ordinary rebalances. The extraordinary rebalance is triggered by the mechanism described below:

- a) Early Redemption or Full Call: Any cash proceeds will be held as "Paid Cash" and reinvested into the index on the following Rebalancing Day. For the avoidance of doubt a Tender must be mandatory, the pure offer to tender a bond will not lead to an adjustment of the index.
- b) Flat Trading: A bond is flat trading if the bond issuer is not expected to meet its coupon payment obligation which means that the buyer of a bond is not responsible for paying the interest that has accrued since the last payment. If a bond is defined to be "flat trading" between two Rebalancing Days the respective accrued interests and coupons will be set to 0. The bond will be removed on the next Adjustment Day, if it is identified as Flat Trading on selection date.
- c) Defaulted Bonds: If the status of a bond changes to "In Default", the bond will remain as part of the index or portfolio at the last available evaluated price provided by the pricing source until the next regular index Rebalancing Day.
- d) Exchange Offers:
 - 1) Optional Exchange Offers: Optional Exchange Offers will not result in an adjustment of the index*

- 2) Mandatory Exchanges Offers:
 - a) In the case when less than 90% of the Amount Outstanding is exchanged the exchange will not be considered to be an event that affects the relevant bond's position in the index.
 - b) In case more than 90% of the Amount Outstanding is exchanged the exchange will be considered in the index calculation by exchanging the relevant bonds, so that the new bond will receive the weight of the old exchanged bond.
- e) The treatment of events for Fungible Bonds depends on whether:
 - 1) The parent bond and the sub-tranche are both index constituents: Both bonds are kept in the index until the next Rebalancing Day. On the next Rebalancing Day, the new bond will be removed and the Amount Outstanding of the parent bond will be increased by the amount of the new bond issue.
 - 2) The parent bond is an index constituent and the sub-tranche is not: on the next Rebalancing Day the Amount Outstanding of the parent bond will be increased by the amount of the sub-tranche.
 - 3) The parent bond is not an index constituent but the sub-tranche is. The fund will be treated as an exchange into the parent bond, if it meets the index eligibility criteria with an amount equal to that of the sub-tranche. On the next Rebalancing Day, the amount of the parent bond will be updated to include its full amount as of the index Selection Day. If the parent bond does not fulfil the selection criteria, the fund will be treated as a deletion and the sub-tranche will be removed from the index at the latest available price.
- f) Payment-in-Kind Bonds: These bonds pay interest in additional bonds rather than in cash. Assuming the additional bonds will be sold immediately, payments-in-kind are therefore considered as cash in all Total Return calculations.
- g) Ex-dividend Bonds: "Ex-dividend" means that the next coupon is detached from the bond several days in advance of the coupon payment date. Between ex-date and pay-date a buyer of the bond does not get the right to receive the next coupon. Therefore, accrued interest is negative during that period. However, the coupon will be paid to the original bondholder, i.e. if a bond is already in the index the next coupon payment is held separate in the Variable Coupon Adjustment Factor $CPAdj_{i,t}$. If the bond enters the index during the ex-dividend period $CPAdj_{i,t}$ is zero as the next coupon payment will not accrue to the index.

*For the avoidance of doubt, an optional tender or exchange offer may lead to an index adjustment after the end of the submission period. In case the tender or exchange has been successful for at least 90% of the amount outstanding, the bond will be removed from the index/exchanged into the relevant bond.

4. CALCULATION OF THE INDEX

4.1. INDEX FORMULA

The INDEX is calculated as a Total Return and Price Return index.

The calculation is performed according to the Bond Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>.

A price return index reflects price movements of the INDEX COMPONENTS disregarding accrued interest and coupon payments and only accounting for bond redemption proceeds resulting from corporate actions taking place between two RE BALANCE DAYS. Accordingly, a price return index aims to reflect the price performance of the overall market, or of its particular segment.

A gross total return index seeks to replicate the overall return from holding an index portfolio, thus considering both coupon payments and Corporate Action proceeds in addition to the price changes adjusted for any accrued interest.

The periodic reinvestment formula implies a periodic reinvestment in the INDEX of proceeds resulting from corporate actions and coupon payments in respect of the INDEX COMPONENTS on the next regular REBALANCE DAY following such events. For the period until reinvestment the proceeds are held in a cash component. On the REBALANCE DAY the proceeds are reinvested in the INDEX proportionately to the weights of the INDEX COMPONENTS. The periodic reinvestment formula tracks the performance of the INDEX COMPONENTS relative to their market value on the immediately preceding REBALANCE DAY. The market value for an individual INDEX COMPONENT on a REBALANCE DAY is based on the price for the respective bond and its face value on the SELECTION DAY associated with the REBALANCE DAY.

A more detailed description of the mechanics of the PERIODIC REINVESTMENT formula can be found in the Bond index Methodology under Section 1.2.2 which is available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>.

4.2. ACCURACY

The level of the INDEX will be rounded to two decimal places.

4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Basically, such adjustment needs to be made if a corporate action (as specified in Section 4.4 below) in relation to an INDEX COMPONENT occurs. Such adjustment may need to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX

COMPONENTS and will be made in compliance with the Bond Index Methodology, which is available which is available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>.

4.4. CORPORATE ACTIONS

As part of the INDEX maintenance SOLACTIVE will consider various events – also referred to as corporate actions – which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Bond Index Methodology, which is available which is available on the SOLACTIVE website: <https://www.solactive.com/documents/bond-index-methodology/>. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables.

While SOLACTIVE aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Bond Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

Solactive considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- > Early Redemption (an event that leads to a redemption of a bond before the regular maturity date)
- > Flat Trading (e.g. a bond ISSUER fails to meet its coupon payment obligation)
- > Bond Default (e.g. when the ISSUER fails to meet its coupon payment obligation or repay the principal at maturity)
- > Tender Offers (a holder of a bond is invited to tender the bond for a specific price at a specific time before the regular maturity date)
- > Exchange Offers (type of a tender offer where the ISSUER offers its bondholders to exchange their existing bonds for an asset other than cash)
- > Distressed Debt Exchange (form of debt exchange when bondholders agree to reduce the principal amount of debt securities in order to obtain higher payment priority in the form of secured debt)
- > Bond Funge (bond issue that is attached to an existing one (parent bond). On a defined date the parent bond absorbs the funged bond)

- > Payment-in-Kind Bonds (a situation where a bond pay interest in additional bonds rather than in cash)
- > Conversion of [CoCo] Bonds
- > Debt Issuance
- > Bond Maturity

4.5. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

4.6. MARKET DISRUPTION

Market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

5. MISCELLANEOUS

5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX COMPONENTS or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement established by the INDEX ADMINISTRATOR.

5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Methodology Policy, which is incorporated by reference available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "Announcement", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal, financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which the INDEX is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the INDEX, the INDEX rules, and particularly the selection criteria, can no longer be applied coherently or the INDEX is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of the INDEX is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the "OVERSIGHT COMMITTEE") is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

6. DEFINITIONS

"AMOUNT OUTSTANDING" is the face value of the respective bond.

"BENCHMARK REGULATION" shall have the meaning as defined in Section "Introduction".

"BMR" shall have the meaning as defined in Section "Introduction".

"BUSINESS DAY" is in relation to the index is each day, Monday to Friday, except banking holidays as defined by the New York Stock Exchange (NYSE) and SIFMA. With respect to the INDEX any day other than a Saturday or Sunday or a day on which the Securities Industry and Financial Markets Association (SIFMA) recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities. The SIFMA holiday recommendations are set out on the following website (or any successor page): <http://www.sifma.org/services/holiday-schedule/>.

The MDBS46 index is following the same holiday calendars as mentioned above except for the common European banking holidays.

"CALL" means that a bond with a callable feature will be redeemed before the actual maturity date of the bond. The callable feature allows the issuer of the bond to retain the privilege of redeeming the bond before the actual maturity date.

"CONVERTIBLE BONDS" are bonds that can be converted into a predetermined amount of the company's equity at certain times during its life.

"COVERED BONDS" are bonds backed by a ring-fenced pool of assets such as mortgages or public-sector loans. The ISSUER retains the responsibility to maintain the quality of the underlying asset pool.

A "CREDIT EVENT" is the suspension of debt service, insolvency or failure to pay on time.

"DEVELOPMENT BANK" is any government related or government backed financial institution with a focus on official development assistance and a minimum loan book exposure published or reported by the issuer of 25% to a portfolio of diversified Emerging Market countries. Emerging Market country will be defined separately in the annex of the guideline as every country that is not defined as Developed Country by Solactive or not part of the Eurozone.

"Early Redemption" includes every event that leads to a redemption of a bond before the actual maturity date.

"Ex-dividend" means that the next coupon is detached from the bond several days in advance of the coupon payment date.

"EXCHANGE OFFER" means that the holder of a bond is invited to exchange the existing bond to another debt security.

In particular an "EXTRAORDINARY EVENT" is

- > an early redemption of the bond
- > a credit event

"EMERGING MARKET COUNTRY" is every country that is not defined as Developed Country by Solactive and is not a part of the Eurozone. Solactive Country Classification can be found under the following link: <https://www.solactive.com/documents/>

"FIXED COUPON BONDS" are bonds with a coupon rate that is fixed throughout their life, as opposed to bonds with floating, or variable coupons.

A bond is marked as "FLAT TRADING" if the bond issuer will not meet its coupon payment obligation. This means that the buyer of a bond is not responsible for paying the interest that has accrued since the last payment.

"FLOATING RATE NOTES" are bonds with a floating coupon rate, i.e. the coupon payments fluctuate in line with the underlying level of a pre-specified interest rate.

A "FUNGIBLE BOND" is a new issue that has all the same specifications as an existing issue (bonds with the same parameters can be issued in different tranches). At a specific date, the tranches will be combined into one bond. After this date, the parent tranche will include the Amount Outstanding of all new tranches.

A bond is "IN DEFAULT" when the issuer is not able to fulfil its bond payment obligations anymore after the 30 days grace period.

"GUIDELINE" shall have the meaning as defined in Section "Introduction".

"INDEX" shall have the meaning as defined in Section "Introduction".

"INDEX ADMINISTRATOR" shall have the meaning as defined in Section "Introduction".

"INDEX CALCULATOR" is SOLACTIVE or any other appropriately appointed successor in this function.

"INDEX COMPONENT" is each bond reflected in the INDEX.

"INDEX COMPONENT REQUIREMENTS" shall have the meaning as defined in Section 2.1.

"INDEX CURRENCY" is the currency specified in the column "Currency" in the table in Section 1.2.

"INFLATION-LINKED BONDS" are bonds whose principal and coupon payments are indexed to inflation.

"ISSUER" is the issuing entity of the respective bond.

"LAST EVALUATED ASK PRICE" the last available evaluated ask price by the designated PRICING PROVIDER.

"LAST EVALUATED BID PRICE" the last available evaluated bid price by the designated PRICING PROVIDER.

"LAST EVALUATED MID PRICE" is the average between LAST EVALUATED ASK PRICE and LAST EVALUATED BID PRICE.

"LIVE DATE" is 13th April 2018 (for Total Return versions), 25th April 2018 (for Price Return versions), 31th July 2018 (for Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped TR Index), 1st October 2018 (Solactive Global Multilateral Development Bank Bond USD 40% 1-5 Year 60% 5-10 Year TR Index)

"MULTILATERAL DEVELOPMENT BANK" is a Development Bank whose shareholders list includes among other members all G7 countries.

"OVERSIGHT COMMITTEE" shall have the meaning as defined in Section 5.5.

"PAID CASH" is either the value of the coupon payments between Rebalancing Days or the resulting payment when a bond is removed from the index between Rebalancing Days. On the next Rebalancing Day "Paid Cash" will be reinvested in the index.

"PAYMENT-IN-KIND BONDS" are a type of bonds that pay interest in additional bonds rather than in cash.

"PREFERRED SECURITIES" combine both debt and equity characteristics.

"PRICING PROVIDER" is Intercontinental Exchange ("ICE")

"REBALANCING DAY" is the last Business Day of each month.

"SECURITIZED BONDS" are bonds secured against specific assets or receivables (ABS), mortgages (MBS) or cash flows.

"SELECTION DAY" is 6 BUSINESS DAYS before the scheduled REBALANCE DAY.

"SINKABLE BONDS" are bonds that are backed by a fund that sets aside money on a regular basis. A sinkable bond issuer is required to buy a certain amount of the bond back from the purchaser at various points throughout the life of the bond.

"SOLACTIVE" shall have the meaning as defined in Section "Introduction".

"START DATE" is 30th December 2011.

"STEP-UP COUPON BONDS" are bonds whose coupons increase while the bond is outstanding. The coupon amounts are determined at issuance.

"TENDER OFFER" means that a holder of a bond is invited to tender the bond for a specific price at a specific time before the actual maturity date.

A "TOTAL RETURN INDEX" measures the performance of the index components by assuming that all distributions are reinvested into the index, i.e. the index does not only reflect pure price movements.

"ZERO COUPON BONDS" do not pay interest but are issued at a discount.
