## INTRODUCTION

This document (the "Guideline") is to be used as a guideline with regard to the composition, calculation and maintenance of Solactive Stay at Home Online Select 12% VT Index (the "Index"). Any amendments to the rules made to the Guideline are approved by the Index Committee specified in Section 5.5. The Index is calculated, administered and published by Solactive AG ("Solactive") assuming the role as index administrator (the "Index Administrator") under the Regulation (EU) 2016/1011 (the "Benchmark Regulation" or "BMR"). The name "Solactive" is trademarked.

The Guideline and the policies and guidelines referenced herein contain the underlying principles and rules regarding the structure and operation of the Index. Solactive does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the Index nor the level of the Index at any certain point in time nor in any other respect. Solactive strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for Solactive – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the Index. The publication of the Index by Solactive does not constitute a recommendation for capital investment and does not contain any assurance or opinion of Solactive regarding a possible investment in a financial instrument based on this Index.

## 1. INDEX SPECIFICATIONS

#### 1.1. SCOPE OF THE INDEX

The Solactive Stay at Home Online Select 12% VT Index ("Index") is a USD (the "Index Currency") denominated index.

The Index takes a variable exposure to the Underlying Index with the aim to achieve an annualized volatility of less than or equal to 12%. The Index therefore notionally invests in the Underlying Index in excess of a hypothetical money market position at the 3-month USD Libor rate (as published on Thomson Reuters under the RIC USD3MFSR=, Bloomberg US0003M Index). The index allows a maximal leverage of 100%.

#### 1.2. IDENTIFIERS AND PUBLICATION

The Index is published under the following identifiers:

Name	ISIN	Currency	Туре	RIC	BBG ticker
Solactive Stay at Home Online Select 12% VT Index	DE000SL0A261	USD	ER	.SOLATION	SOLATION Index

The Index is published via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the Index via its information systems. In the event that data cannot be provided to the price marketing services of Boerse Stuttgart GmbH, the Index cannot be published.

Any publication in relation to the Index (e.g. notices, amendments to the Guideline) will be available at the website of the Index Administrator: https://www.solactive.com/news/announcements/.

#### 1.3. INITIAL LEVEL OF THE INDEX

The initial level of the Index on 15<sup>th</sup> Jan 2014 (the "Start Date") is 1000. Levels of the Index published for a period prior to the 14<sup>th</sup>April 2020 ("Launch Date") have been back-tested.

## 2. INDEX SELECTION

#### 2.1. INDEX CONSTITUENTS

The Index is composed of the following two underlying (each of them an Underlying Component, together the Index Components):

Component	Name	Currency	RIC	BBG Ticker
1	Solactive Stay at Home Online Select Equity Index	USD	.SOLATIEN	SOLATIEN Index
2	3-month USD Libor rate	USD	USD3MFSR=	US0003M Index

## 3. CALCULATION OF THE INDEX

#### 3.1.INDEX FORMULA

The Index Level for any Calculation Day is determined in accordance with the following formula:

$$V_{t} = V_{t-1} \times \left[ 1 + w_{t-1} \times \left( \frac{A_{t}}{A_{t-1}} - \frac{MM_{t}}{MM_{t-1}} \right) - ID * DCF (t-1, t) \right]$$

$$w_t = \min\left(MaxWeight, \frac{Volatility\ Target}{RefVol_t}\right)$$

Where:

 $Subscript_{\ (t)}$  refers to the given Index Business Day

 $Subscript_{\ (t-1)}$  refers to the Index Business Day immediately preceding Index Business  $\mathsf{Day}_{(t)}$ 

 $V_{date}$  is the Strategy Value on calendar date (date)

 $A_{date}$  is the Asset Value on calendar date (date)

 $\mathit{MM}_{\mathit{date}}$  is the Money Market Value on calendar date<sub>(date)</sub>

ID Index Deduction Rate, i.e. 3% per annum1

DCF (t-1,t) means the Day Count Fraction Actual/360 determined in respect of the period from and including Index Business Day (t-1) to and excluding Index Business Day t.

#### Specific parameters:

Asset = Underlying Equity Index (rebalanced basket defined above – separate rules)

MaxWeight = 100%

*Volatility Target* = 12%

 $RefVol_t = Max(Vol20d_{(t-2)}, Vol60d_{(t-2)})$ 

$$Vol20d_{(t)} = \sqrt{\frac{252}{5 \times 20} \times \sum_{i=0}^{19} \left( r_{t-i} - \frac{1}{20} \times \sum_{j=0}^{19} r_{t-j} \right)^2}$$

$$Vol60d_{(t)} = \sqrt{\frac{252}{5 \times 60} \times \sum_{i=0}^{59} \left( r_{t-i} - \frac{1}{60} \times \sum_{j=0}^{59} r_{t-j} \right)^2}$$

With 
$$r_t = \ln\left(\frac{A_t}{A_{t-1}}\right)$$

Money Market (excess return over \$3m Libor):

$$MM_t = MM_{Rt} \times Max(0, 1 + R_{Rt} \times DCF_c(Rt, t))$$
  
 $MM_{(0)} = 100$ 

Where:

 $MM_{Rt}$  means the Index Value on the US Dollar 3 Month ICE Libor Interest Rate ["USD3MFSR=, Bloomberg US0003M Index"] Cash Business Day (Rt);

Rt means the Cash Business Day immediately preceding the Cash Business Day(t)

 $R_{Rt}$  means the latest available US Dollar 3 Month ICE Libor Interest Rate for the US Dollar 3 Month ICE Libor Interest Rate ["USD3MFSR=, Bloomberg US0003M Index"] as of the Cash Business Day<sub>(Rt)</sub>

 $DCF_c(Rt,t)$  means the Day Count Fraction Actual/360 determined in respect of the period from and including the Cash Business Day (Rt) immediately preceding such Cash Business Day (t) to and excluding such Cash Business Day (t)

A Cash Business Day is any day, that is a weekday (i.e. Mo-Fr).

#### 3.2. ACCURACY

The Index Level will be rounded to 2 decimal places.

#### 3.3. RECALCULATION

Solactive makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the index determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. Solactive endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the Solactive website: www.solactive.com.

#### 3.4. MARKET DISRUPTION

In periods of market stress Solactive calculates its indices following predefined and exhaustive arrangements as described in the Solactive <u>Disruption Policy</u>, which is incorporated by reference and available on the Solactive website: www.solactive.com. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more Index Components. The determination of the Index may be limited or impaired at times of illiquid or fragmented markets and market stress.

## 4. MISCELLANEOUS

#### 4.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the Index (for example the determination of the Index Universe (if applicable), the selection of the Index Components (if applicable) or any other relevant decisions in relation to the Index) shall be in accordance with the Solactive's Discretion Policy, which is available at Solactive's website: www.solactive.com.

#### 4.2. METHODOLOGY REVIEW

The methodology of the Index is subject to regular review. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the Index, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the <a href="Methodology Policy">Methodology Policy</a>, which is incorporated by reference and available on the Solactive website: www.solactive.com.

Such change in the Methodology will be announced on the Solactive webpage under the section "Announcement", which is available at https://www.solactive.com/news/announcements/. The date of the last amendment of this Index is contained in this Guideline.

#### 4.3. CHANGES IN CALCULATION METHOD

The application by the Index Calculator of the method described in this document is final and binding. The Index Calculator shall apply the method described above for the composition and calculation of the Index. However, it cannot be excluded that the market environment, supervisory, legal, financial or tax reasons may require changes to be made to this method. The Index Calculator may also make changes to the terms and conditions of the Index and the method applied to calculate the Index that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The Index Calculator is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the Index Calculator will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

#### 4.4. TERMINATION

Solactive makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, Solactive follows a clearly defined and transparent procedure to adapt index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of an index may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

Solactive has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified

in the Termination Policy, which is incorporated by reference and available on the Solactive website: www.solactive.com.

#### 4.5. OVERSIGHT

An index committee composed of staff from Solactive and its subsidiaries (the "Index Committee") is responsible for decisions regarding any amendments to the rules of the Index. Any such amendment, which may result in an amendment of the Guideline, must be submitted to the Index Committee for prior approval and will be made in compliance with the "Solactive Methodology Policy", which is available at [insert address: www.solactive.com.

#### 5. DEFINITIONS

This section contains defined terms used throughout this Guideline document.

The "Underlying Components" are the components listed in Section 2.1, together known as the "Index Components."

A "Index Business Day" is any weekday that Toronto, New York, London and Tokyo Stock Exchanges are all open for trading. i.e. if one exchange has a holiday, the Index will also not be calculated.

A "Publication Day" is each Index Business Day.

The "Target Volatility" is 12%

The "Exchange" is, in respect of the Index and every Index Component, the respective primary exchange where the Index Component has its primary listing. The Committee may decide to declare a different stock exchange the "Exchange" for trading reasons, even if the company is only listed there via a Stock Substitute.

The "Index Calculator" is Solactive AG or any other appropriately appointed successor in this function.

The "Index Currency" is USD.
