1. INDEX SPECIFICATIONS

1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Commodities
Strategy	Tracking daily price of Gold hedged to CHF
Regional Allocation	Global

1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive Gold Daily CHF Hedged Index	DE000SL0Q1S5	CHF	AR*	.SGLDCHFH	SGLDCHFH Index

*AR means that the Index is calculated as Adjusted Return.

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on 2019-03-05, the START DATE, is 100 (the “BASE LEVEL”). Index levels from 2025-07-25, the LIVE DATE, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back tested.

1.4. PRICES AND CALCULATION FREQUENCY

The closing level of the INDEX of each CALCULATION DAY is calculated at 09:00 CET of the next CALCULATION DAY, based on the CLOSING PRICES on the EXCHANGES on which the INDEX COMPONENT is listed. The CLOSING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the 4 pm London time WM Fixing, quoted by Refinitiv. If there is no 4pm London time WM Fixing for the relevant CALCULATION DAY, the last available 4pm London time WM Fixing will be used for closing level calculation.

The level of the INDEX is calculated on each CALCULATION DAY based on the most recently available price of the INDEX COMPONENT and the most recently available SPOT RATE and FORWARD RATE.

Should there be no current CLOSING PRICE for the INDEX COMPONENT, the latter for: (i) the most recent CLOSING PRICE; or (ii) the last available TRADING PRICE for the preceding CALCULATION DAY is used to calculate the INDEX level.

Should there be no current SPOT RATE and FORWARD RATE, the most recent rate SPOT RATE and FORWARD RATE are used to calculate the INDEX level.

1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE.

2. INDEX SELECTION

As this INDEX is based on a static basket, no selection takes place.

2.1. INDEX UNIVERSE REQUIREMENTS

Not applicable as no ordinary rebalance takes place.

2.2. SELECTION OF THE INDEX COMPONENTS

The INDEX is based on the following INDEX COMPONENT:

Index Component	Currency	Ticker	Weight
LBMA Gold Price PM USD	USD	GOLDLNPM Index	100%

3. CALCULATION OF THE INDEX

3.1. INDEX FORMULA

The level of the INDEX as of START DATE is set to:

$$Index_{t=START\ DATE} = Base\ Level$$

Where:

Base Level: is the BASE LEVEL as defined in Section 1.3.

For all other CALCULATION DAY t, the INDEX is calculated as follows:

$$Index_t = Index_{t-1} * \left(1 + \left(\left(\frac{IC_t}{IC_{t-1}} - 1 \right) \times \frac{FX_t}{FX_{t-1}} + \left(\frac{FWD_{t-1}}{FX_{t-1}} - 1 \right) \times \frac{DCF_{t,t-1}}{360} \right) \right) * Mult_{t-1}$$

Where:

Index_t: The level of the INDEX as of CALCULATION DAY t.

Index_{t-1}: The level of the INDEX as of CALCULATION DAY t-1.

IC_t: The CLOSING PRICE of the INDEX COMPONENT as of CALCULATION DAY t.

IC_{t-1}: The CLOSING PRICE of the INDEX COMPONENT as of CALCULATION DAY t-1.

FX_t: The 4pm London time WMR spot rate (mid-price), i.e. the Spot RATE, to convert one unit of USD to CHF as of CALCULATION DAY t.

FX_{t-1}: The 4pm London time WMR spot rate (mid-price), i.e. the SPOT RATE, to convert one unit of USD to CHF as of CALCULATION DAY t-1.

FWD_{t-1}: The 4pm London time WMR forward rate (mid-price, Tomorrow Next settlement), i.e. the FORWARD RATE, to convert one unit of USD to CHF as of CALCULATION DAY t-1.

DCF_{t,t-1}: The number of calendar days between CALCULATION DAY t (including) and CALCULATION DAY t-1 (excluding).

Mult_{t-1}: The MULTIPLIER, calculated according to Section 3.2.

3.2. MULTIPLIER FORMULA

The MULTIPLIER is calculated according to the following formula:

$$Mult_t = \frac{FWD_t}{FX_t}$$

Where:

FX_t : The 4pm London time WMR spot rate (mid-price) to convert one unit of USD to CHF as of CALCULATION DAY t .

FWD_t : The 4pm London time WMR forward rate (mid-price, Tomorrow Next settlement) to convert one unit of USD to CHF as of CALCULATION DAY t .

3.3. ACCURACY

The level of the INDEX will be rounded to 2 decimal places.

3.4. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for a variety of reasons (internal or external) and therefore cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period. The understanding of “a reasonable period of time” as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

3.5. MARKET DISRUPTION

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the Solactive Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

4. MISCELLANEOUS

4.1. DISCRETION

Any discretion which may need to be made in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

4.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section “[Announcement](https://www.solactive.com/news/announcements/)”, which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

4.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

4.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 “Methodology Review”) to maintain continued reliability and comparability of the indices. Nevertheless, if no other

options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

4.5. INDEX COMMITTEE

An index committee composed of staff from SOLACTIVE and its subsidiaries (the “INDEX COMMITTEE”) is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the INDEX COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.
