## Rationale for the Market Consultation

In order to align with the proposed ESMA regulations, funds linked to the aforementioned indices that are marketed to investors within Europe must comply with the new requirements for specific naming conventions of these funds. As an index provider, Solactive is not explicitly required to abide by these requirements but any products linked to our indices must comply by May 21<sup>st</sup>, 2025. As a result, Solactive is proposing an alignment with the new regulations to ensure that the regulatory transition of linked products remain smooth for the end users of the index.

## Proposed Changes to the Index Guideline

The following Methodology changes are proposed in the following points of the Index Guideline 2.2 Selection of the Index Components:

*From:*

Based on the INDEX UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the SELECTION DAY in accordance with the following rules (the "**INDEX COMPONENT REQUIREMENTS**"):

The selection is done based on screening of publicly available information such as financial news, business profiles, and company publications using ARTIS®, SOLACTIVE'S proprietary natural language processing algorithm.

Using keywords that describe the index theme, ARTIS® identifies companies that have or are expected to have significant exposure to the provision of products and/or services that contribute to the clean water industry.

The algorithm then ranks the companies according to the frequency with which the company is referenced in relation to the specific keywords ("Index Score"). Companies are only eligible if they generate at least 50% of their revenues from clean water industry related business operations. This may include companies involved in:

1. Industrial water treatment, recycling (including water reclamation), purification, and conservation
2. Water storage, transportation, metering, and distribution infrastructure
3. Production of household and commercial water purifier and heating products
4. Provision of consulting services identifying and implementing water efficiency strategies at the corporate and municipal levels.

The companies selected after completion of the above steps will be evaluated on the criteria outlined below. The evaluation is based on data provided by the DATA PROVIDER:

- UN Global Compact Principles
  - Non-Compliance with the UNGC
- Controversial Weapons
  - Companies involved in the production development or maintenance of Anti-personnel Mines, Biological or chemical weapons, Cluster munitions, Depleted uranium, Nuclear Weapons, or any other weapon that violate humanitarian principles through normal use
  - Companies that produce or develop key and dedicated components for controversial weapons

  - Companies currently  $\geq 50\%$  owned by a company that is involved in controversial weapons
- Small Arms
  - $>5\%$  of their revenue from the production or distribution of arms, both public and private
- Thermal Coal

- 10% revenues from the exploration mining or refining of thermal coal
  - Companies that base 30% or more of their operations on thermal coal
  - Companies that produce >20 million tons of thermal- coal annually and are actively expanding
- Conventional Oil & Gas
  - >5% revenue from conventional oil and gas production, including natural gas, petroleum, and crude oil
  - Companies building or operating pipelines that significantly facilitate export of conventional oil and gas
