INTRODUCTION

This document (the “**GUIDELINE**”) is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive Equity ESG Select Funds RC Index (the “**INDEX**”). Any amendments to the rules made to the **GUIDELINE** are approved by the **OVERSIGHT COMMITTEE** specified in Section 5.5. The **INDEX** is owned, calculated, administered and published by Solactive AG (“**SOLACTIVE**”) assuming the role as administrator (the “**INDEX ADMINISTRATOR**”) under the Regulation (EU) 2016/1011 (the “**BENCHMARK REGULATION**” or “**BMR**”). The name “Solactive” is trademarked.

The text uses defined terms which are formatted with “SMALL CAPS”. Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

REBALANCE

2.2. ORDINARY REBALANCE

The INDEX is rebalanced potentially daily by inspecting the current level of the realized volatility of the Basket relative to the TARGET VOLATILITY.

Every day, if the realized volatility of the Basket rises, the exposure to the Basket is reduced in favor of the hypothetical cash position and, equally, when Basket realized volatility is low, the exposure to the Basket is increased, up to a maximum of 200%

3. CALCULATION OF THE INDEX

3.1. INDEX FORMULA

The Basket underlying the INDEX is calculated according to the following formula:

On the BASKET START DATE:

$$B_{BST} = 1000$$

Where:

On each CALCULATION DAY t following the BASKET START DATE:

$$B_t = B_{t-1} * \sum_{i=1}^4 w_i * \frac{NAV_{i,t}}{NAV_{i,t-1}}$$

Where:

B_t : The level of the Basket CALCULATION DAY t

B_{t-1} : The level of the Basket CALCULATION DAY t-1

$NAV_{i,t}$: The NET ASSET VALUE of the Mutual Fund i as of CALCULATION DAY t

w_i : The weight of Mutual Fund i as shown in Section 2.1.

The INDEX is calculated according to the following set of formulae:

On the INDEX START DATE:

$$Index_{IST} = 1000$$

On each CALCULATION DAY t following the INDEX START DATE:

$$Index_t = Index_{t-1} * \left(1 + E_{t-1} * \left(\frac{B_t}{B_{t-1}} - 1 - \frac{rate_{t-1}}{100} DCF_{t,t-1} \right) \right)$$

Where:

$Index_t$: The Level of the INDEX as of CALCULATION DAY t

E_{t-1} : The exposure as of CALCULATION DAY t-1

B_t : The level of the Basket CALCULATION DAY t

B_{t-1} : The level of the Basket CALCULATION DAY t-1

$rate_{t-1}$: The level of 3-month EURIBOR (RIC: EURIBOR3M=) as of CALCULATION DAY t-1, expressed in %.

$DCF_{t,t-1}$: The number of calendar days between CALCULATION DAY t-1 (excluded) and CALCULATION DAY t (included) divided by 360.

The exposure as of CALCULATION DAY t is calculated according to the following formula for each CALCULATION DAY (including the INDEX START DATE):

$$exp_t = \min \left(maxExposure, \frac{TV}{\sigma_{t-1}} \right)$$

Where:

$maxExposure$: The maximal exposure of 200%.

TV : The TARGET VOLATILITY of 4%

σ_{t-1} : The realized volatility of the Basket as determined on CALCULATION DAY t-2

The realized volatility of the Basket as of CALCULATION DAY t is calculated according to the following formula:

$$\sigma_t = \sqrt{\frac{252}{20} * \sum_{i=0}^{19} \left(\ln \left(\frac{B_{t-i}}{B_{t-i-1}} \right) \right)^2}$$

Where:

B_{t-i} : The level of the Basket as of CALCULATION DAY t-i

B_{t-i-1} : The level of the Basket as of CALCULATION DAY t-i-1

3.2. ACCURACY

4. The level of the INDEX will be rounded to 2 decimal places. Any other values (like volatility and exposure) are used unrounded with full precision.

4.1. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of “a reasonable period of time” as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the SOLACTIVE Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. 5. MISCELLANEOUS

5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section “Announcement”, which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 “Methodology Review”) in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the INDEX, the index rules, and particularly the selection criteria, can no longer be applied coherently or the INDEX is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an INDEX is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the “**OVERSIGHT COMMITTEE**”) is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.
