List of governance factors considered	<ul style="list-style-type: none">> Exclusion of companies found to be in breach of the UN Global Compact Principles.

Data and Standards used

Data Input	The data used to construct the index is sourced externally from Osmosis Investment Management
-------------------	---

Verification and quality of data	The provider of ESG-related data input is selected by the Administrator based on an assessment of its existing processes in order to ensure the reliability and representativeness of the ESG-related data. The data provider has established processes in accordance with accepted and established market standards that ensure the permanent quality and reliability of the ESG-data provided.
Reference standards	International standards referenced by the index methodology are listed in the respective section above.
Information updated on	23/02/2024
Reason for update:	Initial document creation.
