ESG Factors Applied in the Benchmark Methodology

List of environmental factors considered	> Exclusion of companies with major involvement in the coal industry.
List of social factors considered	> Exclusion of companies with major involvement in the tobacco industry.
List of governance factors considered	> The RAFI Diversity & Governance Index Series uses four signals to determine a company's overall Diversity & Governance score: Diversity (D), Governance (G), Financial Discipline (FD), and Low Volatility (LV). > Among other selection steps, the index excludes the bottom 20% (by adjusted fundamental weight) of companies with the lowest Diversity (D) score. > Among other selection steps, the index excludes the bottom 20% of companies with the lowest Governance (G) Score > Financial Discipline (FD), and Low Volatility (LV) are based on financial metrics and provided by RAFI Indices. > Index constituents' fundamental weights are tilted by their respective Diversity & Governance score. A higher Diversity and Governance score increases the weighting of any constituent.

Data and Standards used

Data Input	The data used to construct the index is sourced externally from Institutional Shareholder Services (ISS ESG)
Verification and quality of data	The provider of ESG-related data input is selected by the Administrator based on an assessment of its existing processes in order to ensure the reliability and representativeness of the ESG-related data. The data provider has established processes in accordance with accepted and established market standards that ensure the permanent quality and reliability of the ESG-data provided.
