## Der Aktionaer CO2 Index

### DESCRIPTION

The greenhouse effect has become the biggest threat to our ecosystem. Carbon dioxide, better known as CO<sub>2</sub>, has long been identified as the main cause of climate change and global warming. The consequences of this realization are alarming. Since the beginning of industrialization, CO<sub>2</sub> concentration has increased by 45 percent. The reasons for this are not only the increased traffic and overpopulation of the world, but also the burning of oil and natural gas, wood and coal. The footprint that the greenhouse gas leaves on our planet is large and tangible for everyone. The number of companies that actively take care of minimizing the CO<sub>2</sub> footprint. On the subject of emissions trading, however, the financial markets could only watch for a long time, especially since emissions trading regulated by politics was not possible. Only since 2005 have investors in the EU had the opportunity to participate and participate in the price development of emission allowances, so since then they have been able to invest in the market with corresponding products. Such a product is now available to you with the new CO<sub>2</sub> Index from DER AKTIONÄR.
