

Advanced Research Ultra Risk Parity Index

INDEX DESCRIPTION

An index which tracks the performance of a multi-asset strategy that balances risk equivalently among four broad asset classes: global equities, commodities, U.S. Treasury Inflation-Protected Securities (TIPS) and U.S. Treasury Futures. The Advanced Research Ultra Risk Parity Index provides leveraged exposure to the Advanced Research Risk Parity Index by using an implied financing rate to target 1.4 times the asset class exposures of the Advanced Research Risk Parity Index at each quarterly rebalance. The Ultra Risk Parity Index seeks to outperform equities over the long run with comparable risk.

OVERVIEW

What is risk parity?

An asset allocation strategy that involves two key steps:

1. Select asset classes that are biased to outperform during different economic environments, and
2. Structure each asset class to target similar return and risk.

Why does it make sense?

By improving diversification, risk parity can potentially offer higher returns relative to risk compared to equities or equity-centric portfolios.

How can it be used?

Either as an alternative asset or a total public portfolio solution.

SIMULATED PERFORMANCE

4/30/1998 - 6/30/2022

Values between April 30, 1998 and December 14, 2021 have been calculated pursuant to a backtested methodology. Data shown after December 14, 2021 is based on the live index track record. The inception date for the Advanced Research Ultra Risk Parity Index (UPARTR) was April 30, 1998. Backtested performance is hypothetical and is provided only for informational purposes to indicate historical performance had the index been available over the relevant time period. Investors have requested this information from the index provider as a means to follow the index's hypothetical performance on a year-to-date basis. The MSCI World Index ("MSCI World Index") is market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world. Index returns reflect the reinvestment of income, dividends and capital gains, if any, but do not reflect fees, brokerage commissions or other expenses of investing. Investors may not make direct investments into any index.

CONSTITUENT REQUIREMENTS

The Advanced Research Ultra Risk Parity Index targets a leveraged exposure to the Advanced Research Risk Parity Index. By extension, index constituents must fulfill the following conditions:

- An exchange traded product (ETF) that tracks a designated asset class and trades on a regulated stock exchange with at least \$100 million USD in assets under management and demonstrates adequate trading volume and liquidity with aggregate volume over the last 90 days of at least 100,000 shares traded.
- A group of securities constructed as an index consisting of individual securities such as stocks, bonds, and futures that trade on a regulated exchange and demonstrate adequate trading volume and liquidity for an exchange traded product as determined by the index provider.
- The individual asset class proxies are modeled using the exchange traded securities and indexes and will have the following corresponding weights (based on 1.4 times the asset class exposures of the Advanced Research Risk Parity Index):

35% Global Equities	17.50% U.S.
	7.00% Non-U.S. Developed
	10.50% Emerging Markets
35% Commodities (equities, except gold)	14.0% Physical Gold
	7.35% Energy
	7.35% Diversified Mining
	4.20% Agriculture
	1.05% Clean Energy
	1.05% Water
49% U.S. Treasury Inflation Protected Securities (TIPS) Target 15+ year maturity	
49% U.S. Treasuries 10-Year and Ultra Treasury Bond Futures
