Solactive UmweltBank Global Investable Universe SDG PAB Index PR

DESCRIPTION

The Index aims to track the global stock market, while applying the sustainable investment criteria of UmweltBank. The sustainable investment criteria consist of negative and positive screening criteria as well as alignment with the Paris Climate Agreement. UmweltBank's negative criteria incorporate norm-based and sector-based exclusions. The positive screening criteria aim to identify companies with a positive impact towards the implementation of the 17 Sustainable Development Goals of the United Nations. Additionally, the underlying assets are selected in such a manner that the resulting benchmark portfolio's GHG emissions are aligned with the long-term global warming target of the Paris Climate Agreement, including only companies operating in accordance with market standards for responsible business conduct (Norms-Based Research) and controversial weapons.
