BÖRSE ONLINE Globale Dividenden-Stars Index

DESCRIPTION

Dividends are for investors an important factor. The "BÖRSE Online Global Dividend-Stars index" is a dynamic index. There is an annual review of the index members. The Index's stock universe is defined to include only stocks that have the strongest long-term dividend growth, and only stocks that have paid dividends consistently over the last 10 years and have at least consistently paid dividends over the last five years. To ensure that the dividend is not distributed out of the substance, the dividend payment must not be greater than the net gain. In addition, the cash flow must always be positive over the last three years. Ten percent of the stocks with the worst annual performance are then sorted out from this stock universe. The remaining stocks are then ranked by the highest dividend yield. To achieve a reasonable spread of risk, the two stocks with the best 5-year performance are included in the index from each industry. In ten sectors, that's 20 shares, which are the basis for the "BÖRSE Online Global Dividend-Stars index".
